Re: Far Fabbri/Euro Rides Double Shock

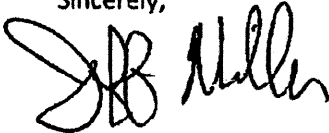

Sub: Vehicle attachment Bolts

Fabbri Amusements, Inc. is the North American representative for Far Fabbri S.r.l./Euro Rides, the manufacturer of the Double Shock.

As prescribed in the Operation and Maintenance Manual for the Double Shock, the vehicle attachments bolts from the main arm to the car arm require replacement every three years. However, if the bolts are inspected and NDT tested every twelve months and do not show any signs on failure, the replacement requirement is not necessary.

Please feel free to contact our office if you have any questions or need further information.

Sincerely,

Jeff Miller
Vice President
Fabbri Amusements, Inc.
